XPRESS CARDS

2021

**Make Communication Simple,
Effective And Meaningful In EveryWay
Possible**

www.xpresscards.in

"

"Far and away the best prize that life offers is the chance **to work hard at work worth doing.**"

– Theodore Roosevelt

LETS SAVE 2 MILLION

Every year 2 billion trees are cut in the process of making papers. Visiting cards play a significant role in paper consumption. But 90% of visiting cards printed are thrown without having a glance. Lets innovate technology to create a sustainable solution for this problem.

XPRESS CARDS

OUR WHY

In this beautiful world we live in, businesses can't thrive without usage of paper. 27 million Business cards are being printed everyday which leads to cutting of 2000 trees. In one week close to 1.2 billion cards will be thrown away without even having a glance. So approximately 72000 trees are being destroyed without any reason. Also, to produce 1 Ton of paper we use 500 litres of water.

Anyways these natural resources are debt we have received from the future generations. We want our Future generation to have these resources as well, and if we continue to do wasting resources, there is no point in it.

We believe modern technology used innovatively will help us to reduce consumption of natural resources effectively.

OUR CARD
BENEFITS
